# SOME SPECIALS

FROM

## OUR COMPLETE LISTS

### THE KELSEY NURSERY SERVICE

**K**ELSEY NURSERY SERVICE PRICES—and yet the finest quality obtainable. It seems paradoxical, but is easily explained. In nurseries where the entire stock is grown near large cities, costs of labor and of land are high. Kelsey stock is grown in quantity in those localities where each type of tree makes the best growth—away from expensive land and labor and where good stock is most economically produced. *“Kelsey stock is grown wherever it grows best.”*

**Q**UANTITY permits this low price. On many varieties we grow our stock by the hundred thousand and some by the million. *“We can deliver a forest.”* This means, among other things, that we can make a selection for *your* order that will insure your satisfaction.

**Q**UANTITY is a comparative term. You need not use nursery grown specimens for thickening your woods planting. We have special grades for hedges and screens—for reforestation—for mass planting—for specimen work, etc. Each grade is designed to meet its particular need exactly at the least expense possible. *“A Grade for every purpose.”*

**V**ARIETY of planting material is with us inclusive of almost everything grown commercially in this country. And if we haven't got it we'll get it for you if it can be obtained. Our facilities are those of a perfectly responsible nursery concern established since 1878.

## DECIDUOUS TREES

---

OWING to the late summer growth on shade trees, it has been impossible to prepare at this time an intelligent list of stocks available. We have thousands of trees for street planting in the popular sizes 2, 2½ and 3 inches caliper) and in such varieties as Norway Maples, Oaks, Lindens, Planes, etc. We will only attempt here to list a few of the rarer varieties for lawn and ornamental purposes. Please write us for prices and information on any variety you are interested in, which does not appear here.

### DOGWOOD (Cornus)

<b>C.Florida (White flowering)</b> 20 feet. White bloom covers tree in May.
